Virtual Conference

A pair of hands, one from the left and one from the right, are shown from the wrist up, cupping a large, glossy red heart. The hands are light-skinned and the heart is a vibrant, realistic red. The background is a soft, out-of-focus light color.

# WCMI 2024

## Dear Attendees

We are glad to announce the World Congress on Cardiology and Medical Interventions to be held on 04 & 05 - Oct - 2024 organized by VDGGOOD and its editorial Board Members. This conference is a unique international platform that confluences all Medical Intervention, Academia, Researchers, Innovators, and Regulators stakeholders – gathering to present and discuss the above-said areas. As the premier event, we have developed a program with your interests in mind. We have increased the number of opportunities for you to network with colleagues from across the world and introduced more focused sessions that will feature cutting-edge presentations, special panel discussions, and livelier interaction with industry leaders and experts.

## About us

**Introduction**

- Bed rest is considered as the routine standard of care in Intensive Care Units (ICUs) which leads to immobility, deconditioning, and weakness.
- Prolonged bed rest and inactivity lead to decreased skeletal muscle use which results in decreased muscle synthesis and increased proteolysis with eventual muscle catabolism, atrophy and weakness.
- The intensive care unit acquired weakness (ICUAW) is associated with joint contractures, thrombocytopenia, resistance to insulin, microvascular alterations, pressure ulcers, pneumonia, extension of the weaning period, delirium, increase in the days of income, increased mortality, and development of disabilities.
- It is also characterized by fatigue and profound neuromuscular weakness.

Thank You
