ABOUT ECO (ICESR 2024)

It's a Right Time to choose the Right Way of Success, Aim of This Environmental Science Research 2024. International Scientific ECO Conference, is to provide the Platform for Researchers across the world to recognize their Achievements, and also its provides a forum to the appropriate target group by organizing Planned Annual Meetings with the aim of generating new knowledge and better understanding. Our world is undergoing a revolutionary period in the creation and dissemination of new knowledge and innovation in many disciplines. Simultaneously humans are on a journey to the achievement of self-actualization, which relates to the ultimate fulfilment of one's potential. The unprecedented levels of discovery and innovation that are the hallmarks of recent decades are giving birth to entirely new meetings, which are in turn stimulating further advances, new opportunities, fresh insights and serve as a 'Continuing Force for Progress'. To improve the common man's life by developing new innovative Environmental Science ideas, Technical tools or models or products of their need. These new ideas and knowledge may be disseminated to the common man by organizing conferences, workshop, seminars and/or awareness programs and by publishing high quality academic international Books, or Journals, or Magazines or Tracts/Pamphlets on any subjects/topics, which is related to the overall growth/improvement/uplift of all sections of society.

DEAR ATTENDEES

We are glad to announce the International Conference On ECO in Environmental Science Research to be held on **26 to 27-April-2024** organized by VDGGOOD and its editorial Board Members. The scope of environmental research is very wide and it deals with many areas like Conservation of natural resources, ecological aspects, pollution of the surrounding natural resources, controlling the pollution, social issues connected to it, and impacts of human population on the environment. The study creates awareness among the people to know about various renewable and nonrenewable resources of the region. It aims to make the citizens competent to do scientific work and to find out practical solutions to current environmental problems.
