International Day of the Girls, celebrated on October 11th each year to recognize girls' rights and the unique challenges girls face around the world. This day is to celebrate them everywhere, amplifying their voices, actions and leadership. Women can be whatever they want to be. Women like Indira Gandhi, Kiran Bedi, Maya Angelou, Frida Kahlo, Malala Yousafzai, Mithali Raj and more prove to us that women are less than no one. These amazing women are role models for us who inspire us through their lives.

"Women are the real architects of society." —Cher

Introduction

- Bed rest is considered as the routine standard of care in Intensive Care Units (ICUs) which leads to immobility, deconditioning, and weakness.
- Prolonged bed rest and inactivity lead to decreased skeletal muscle use which results in decreased muscle synthesis and increased proteolysis with eventual muscle catabolism, atrophy and weakness.
- The intensive care unit acquired weakness (ICUAW) is associated with joint contractures, thromboembolism, resistance to insulin, micro vascular alterations, pressure ulcers, pneumonia, extension of the weaning period, delirium, increase in the days of income, increased mortality, and development of disabilities.
- It is also characterized by fatigue and profound neuromuscular weakness.
