ABOUT CONFERENCE

The World Congress on Medicinal Plants and Natural Products Research (ICMNR-25) is a premier global event that brings together leading experts, researchers, and practitioners in the field of medicinal plant and natural product research.

SOME ROLES AND RESPONSIBILITIES IN THE RESEARCH OF MEDICINAL PLANTS & NATURAL PRODUCT

ETHNO-PHYTOPHARMACOLOGY

The term medicinal plants was first used in 1967 in the context of the study of hallucinogenic plants. A medicinal plant is that species of the plant kingdom, whose parts (flowers, leaves, roots, stems, fruits, or seeds) are directly used or used in some preparation as a medicine to treat a condition or disease. Knowledge of the beneficial properties of medicinal plants to treat diseases represents a valuable resource to preserve the biological and cultural diversity of different ethnicities
