What does a pharmacist do?

Pharmacy is a blend of science, health care, direct patient contact, technology, ethics, and business. A pharmacist is a highly skilled and trusted medication expert. They know and understand everything there is to know about drugs.

Pharmacists undergo extensive education to understand the role that drugs play in different situations. They are familiar with the biochemical makeup of drugs and how that impacts their use, side effects, interactions, and implications of effectiveness. Their role revolves around dispensing prescriptions to patients, conducting health screenings, giving immunizations, and advising on the safe use of medicine.
