Artificial Intelligence

It's a Right Time to choose the Right Way of Success, Aim of 1st International conference on Artificial Intelligence Development in 2024, is to provide the Platform for Researchers across the world to recognize their Achievements, and also it provides a forum to the appropriate target group by organizing Planned Annual Meetings with the aim of generating new knowledge and better understanding. Our world is undergoing a revolutionary period in the creation and dissemination of new knowledge and innovation in many disciplines. Simultaneously humans are on a journey to the achievement of self-actualization, which relates to the ultimate fulfilment of one's potential. The unprecedented levels of discovery and innovation that are the hallmarks of recent decades are giving birth to entirely new meetings, which are in turn stimulating further advances, new opportunities, fresh insights and serve as a 'Continuing Force for Progress'. To improve the common man's life by developing new innovative Medical and Engineering ideas, Technical tools or models or products of their need. These new ideas and knowledge may be disseminated to the common man by organizing conferences, workshop, seminars and/or awareness programs and by publishing high quality academic international Books, or Journals, or Magazines or Tracts/Pamphlets on any subjects/topics, which is related to the overall growth/improvement/uplift of all sections of society.

PRIMING OF PLANT IMMUNITY

The sensitization of stress responsiveness during induced resistance is called priming.

Naïve state → Priming → Primed state

Defence → Biotic attack (Primary stimulus) → DEFENCE

Triggering stimulus

Priming boosts the plant's defensive capacity and brings it into an alarmed state of defence.
